PROFESSIONAL SUMMARY

Web Developer with full-stack experience in PHP (Laravel), JavaScript, and MySQL. Delivered 3 end-to-end projects spanning financial management, travel booking, and AI-powered content recommendation. Working knowledge of Python-based ML workflows. Seeking a Software/Web Developer role to contribute production-ready solutions.

EDUCATION

BS in Information Technology — Islamia University of Bahawalpur Oct 2021 – Jul 2025 | CGPA: 3.62 / 4.00

PROFESSIONAL EXPERIENCE Trainee Web Developer — DevCastle, Bahawalpur, Pakistan Mar 2025 – Nov 2025

- Built and shipped **5+ web features** using PHP (Laravel), JavaScript, HTML5/CSS3, and MySQL following MVC architecture and SDLC best practices.
- Developed RESTful APIs for seamless frontend-backend and third-party communication; maintained MySQL databases with **100% data accuracy** via normalization and integrity constraints.
- **Reduced debugging time ~30%** through active code reviews and QA; managed all work via GitHub with branching strategies for clean, collaborative version control.

KEY PROJECTS

Khata App — Expense Management System — PHP (Laravel) · MySQL · JavaScript · REST API

- Built a financial record system tracking income, expenses, and transactions with audit trails — reducing manual accounting errors to **zero** in testing.
- Designed optimized relational schema across **5+ entity tables**, cutting query response time ~40% via indexing; secured data with role-based access and input validation.

Travel Guide Website — Full-Stack Web App — PHP · JavaScript · MySQL · Bootstrap

- Delivered a fully responsive booking platform with user auth, admin panel, and destination management supporting **multi-role user flows** within a single MVC app.
- Optimized SQL queries reduced retrieval time **~35%**; implemented secure session management eliminating unauthorized access vulnerabilities across all routes.

AI-Powered Web Content Recommendation Module — PHP · Python · Scikit-learn · MySQL · REST API

- Integrated a Scikit-learn classification model into a live web app via PHP REST API bridge, achieving **~80% accuracy** and delivering real-time AI-driven content recommendations.
- Preprocessed user activity datasets with Pandas and trained a classification model — demonstrating end-to-end **ML integration into a production web workflow**.

TECHNICAL SKILLS

Web Development: PHP (Laravel), JavaScript (ES6+), React.js, HTML5, CSS3, Bootstrap

Backend & APIs: RESTful API Development, MVC Architecture, Laravel Framework

Databases: MySQL, SQL Query Optimization, Relational Database Design, CRUD Operations

AI / Data Science: Python, Pandas, NumPy, Scikit-learn, Supervised Learning, Data Cleaning & Preprocessing

Tools & Practices: GitHub, Agile Basics, SDLC, OOP, Data Structures & Algorithms, C/C++, MS Office

CERTIFICATIONS

Advanced Web Application Development (NAV TTC) • Web Application Development (Pearson) • Full Stack Development (Board Infinity) • Speak English Professionally (Georgia Tech) • Virtual Assistant (DigiSkills)

KEY STRENGTHS

Strong analytical & problem-solving skills • Attention to detail and code quality • Deadline-oriented with strong time management • Fast learner with growth mindset • Effective team collaboration & communication
